

Migrate existing graphics to native OSIsoft PI Vision displays

VISION ACCELERATOR

Challenges & Needs

- Secure web based process graphics at the enterprise level
- Migrate multiple graphic platforms to a unified solution
- Cost effective and accurate migration to native PI Vision screens
- Accelerate adoption of digital transformation

	Quality	Built-In Validation Process	Native PI Vision Displays	Industry Specific Support	Cost
RoviSys Solution	High	✓	✓	✓	75% Reduction from manual
Manual	Vulnerable to human error	✗	Additional effort required	?	High
Other Toolsets	Varies	✗	✗	✗	Moderate

Accurate, quick and fully functional native PI Vision graphics - **costs 75% less than manual migration**

Supported Systems

Honeywell

**Rockwell
Automation**

SIEMENS

Success Stories

OIL REFINING

Cost savings \$490K

700 AspenTech OIS graphics of varying complexity

10 hours per display using manual means

Migration Accelerator reduced time to 45 minutes per display

Accelerated adoption of analytics with process graphics

NATURAL GAS

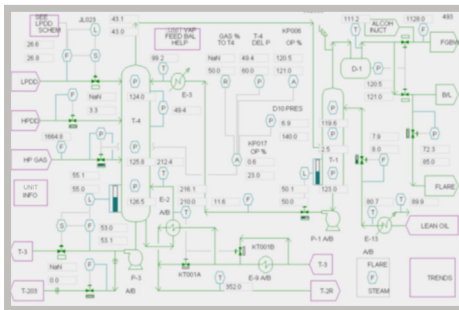

Cost Savings \$300K

400 ProcessNet displays

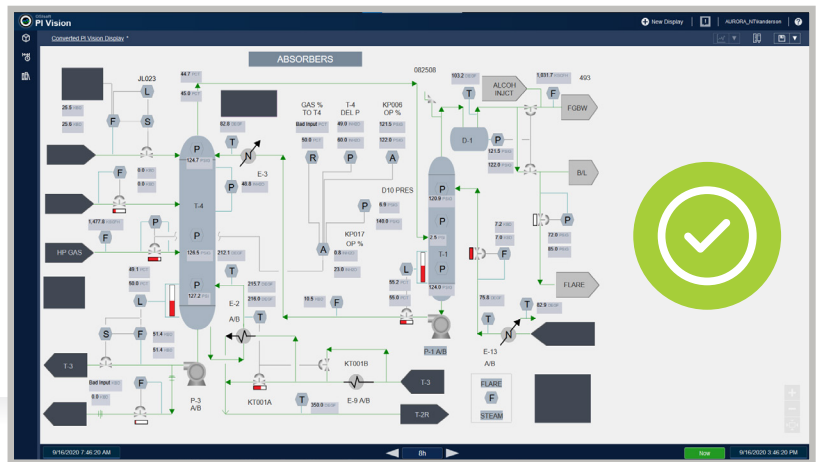

Manual migration 8-10 hours per display

Migration Accelerator reduced time to less than 1 hour per display

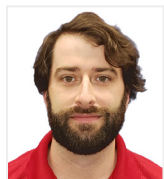

Eliminate legacy technology
